

Pan's Garden – Grade 7

To Be Completed at School AFTER Field Trip

ELABORATE (Post-Visit - at school):

Have students read the [What Organic Fertilizers Mean to Plants and Soil](#) web article individually or in small groups.. Ask them to answer the following questions:

- 1) What are advantages and disadvantages to using organic fertilizers to supplement nutrients like nitrogen in the soil?

Do you think using more (or only?) organic fertilizer will have more benefits that outweigh the risks? Why or why not?

EVALUATE (Post-Visit - at school): Have students complete the [Post-Survey](#). Scan and email completed student surveys to Susan Lerner at slerner@palmbeachpreservation.org.
